ABOUT ME

Hi! I'm Ramit Taparia — an aspiring backend developer with a strong foundation in Python and Node.js. Passionate about building scalable APIs and efficient server-side systems. Currently focusing on expanding my knowledge in distributed systems and cloud technologies.

EDUCATION

Vellore Institute of Technology (VIT Bhopal) <i>Integrated Master of Technology in Artificial Intelligence, Expected 2029</i>	Bhopal, IN <i>September 2024 – 2029</i>
---	--

EXPERIENCE

Product Engineering Intern <i>Viskk</i>	March 2024 – Present <i>Remote</i>
- Built a WPF-based Windows app to reduce eye strain using the 20-20-20 rule. - Implemented smart break timers, system tray controls, and idle detection. - Set up CI/CD pipelines to automate build, testing, and release workflows. - Designed and deployed a responsive landing page for the product to improve user onboarding.	

PROJECTS

GitHub Pipeline ETL <i>Python, SQLite, Docker</i>	June 2026
- Built an end-to-end ETL pipeline in Python to extract, transform, and load structured data into a SQLite database. - Containerized the application using Docker to ensure consistent execution across different environments. - Implemented data cleaning and transformation logic to process raw data before storage. - Designed a modular project structure separating extraction, transformation, and loading stages for maintainability and scalability.	
Fintech Club - Arcade Platform <i>Node.js, Express.js, MongoDB</i>	Feb 2025
- Developed backend services using Node.js and Express.js, with MongoDB integration for persistent data storage. - Implemented user authentication, payment handling, and bulk email services for streamlined registration. - Collaborated with a cross-functional team to ensure scalable and maintainable code architecture.	
QRTick - Ticket Creation script <i>Python, MongoDB</i>	March 2025
- Developed a Python application to generate QR codes from user registration data. - Implemented local storage of QR images and metadata management using MongoDB. - Designed a modular codebase with separate utilities for database initialization and QR generation.	

TECHNICAL SKILLS

Languages: JavaScript, Python
Frameworks: Node.js, Express.js, WPF
Tools/Platforms: Git, GitHub, MongoDB, Postman , SQL
CI/CD: GitHub Actions

ACTIVITIES

- Active member of the Fintech Club at VIT Bhopal. Member of the Technical Team, contributing to the development and optimization of digital solutions to enhance club initiatives and operations.
